

Product factsheet

NEWASYS - consulting firm for REUSE projects

Consulting or service offering (e.g. training)

Description

NEWASYS is a consulting specialised in reuse projects. We analyse all potential sources of

non-conventional water (wastewater from municipal wastewater treatment plants and industrial treatment plants, rainwater, wastewater from swimming pools...) and all potential uses of these resources (irrigation, community uses as road cleaning, hydrocleaning, industrial uses...).

We work with several large municipalities in France (Grand Nancy, Eurometropole de Metz, Communauté urbaine du Havre....) and in different industrial sectors (paper & pulp, iron making, agrofood, cosmetics...)

Target audience

Municipalities and industries willing to reduce their consumption, and reuse their wastewater.
