# Miljødashboard - Environmental Dashboard

Software solution

#### **Description**

The Environmental Dashboard is suitable for visualizing different data sources, and with different levels of detail. Apart from the water domain, the Environemntal Dashboard is also used for traffic mapping and water management (as part of other projects).

#### Target audience

It is being developed with three user groups in mind. 1st technical staff, 2nd administration, 3rd audience.

#### Actors, their roles and interactions

Water utilities, industries, technology providers, end-users, their roles and their interactions.

#### **Technical requirements**

Ordinary PC, tablets or any smart phone.
